# FOREWORD

---

**TTcoin**, unlike many cryptocurrencies, turns its investments into real projects. Established companies and brands bear the name and logo of **TTcoin**. The payment method of these companies and brands is **TTcoin**.

**TTcoin** aims to combine all projects into one. It includes Web3, virtual worlds, payment systems, coins, tokens, airdrops. It aims to integrate all tasks in a single network and provide convenience to users.

Investments are protected and offered to the public. In this way, financial support is provided for **TTcoin**. Furthermore, users holding TC tokens will have a say in **TTcoin**, through the systems that are going to be set up in the future.

The current goal of the **TTcoin** team is to present the project to many users. Then, when all plans are finished, financial support will be provided to the stock markets and the team will work towards the target of \$0.01.

It is planned to achieve these goals with several many projects between 2022 and 2024.

**TTcoin** will also offer these companies to the public in the companies to be established in the future. In this way, **TTcoin** wants to maintain its presence in many areas.

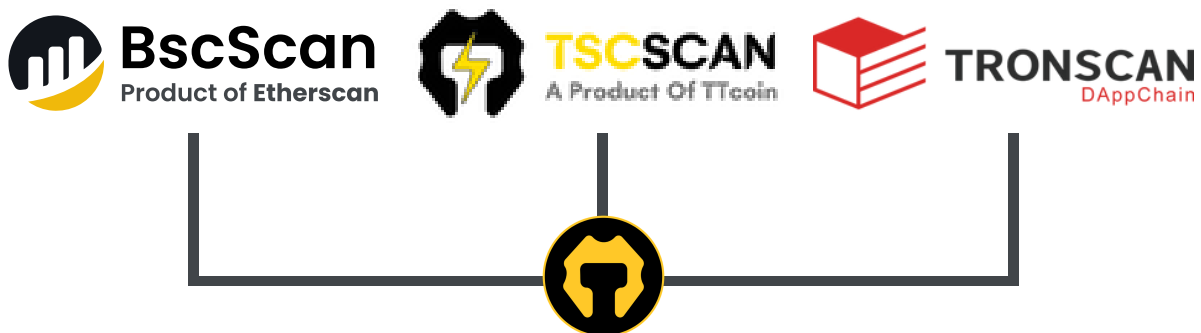

*"Your investments are safe with TTcoin. More than just a cryptocurrency."*

## WHAT IS TTCOIN?

---

**TTcoin** first launched the token project under the **TRC20** smart contract on the **Tronscan** network on **March 24, 2021**. (Later, he created his projects in the **BSC** system, including his own Blockchain **Tscscan.com**.)

The project team published the **TTcoin Network** application on Google Play on June 16 to expand the community.

In this way, users started to earn **TTcoin** by mining. It reached 2 million user registrations in a short time and was listed on 8 exchanges in 3 months. In a short time, it increased its value by 400%.

Many applications have been created and published on the Google Play store, including the **TTcoin Rewards** application.

In this way, **TTcoin** gave rewards to users who fulfilled the tasks in the applications. Advertising revenues provided financial gain to the projects.

## WHAT IS THE PURPOSE OF TTcoin?

---

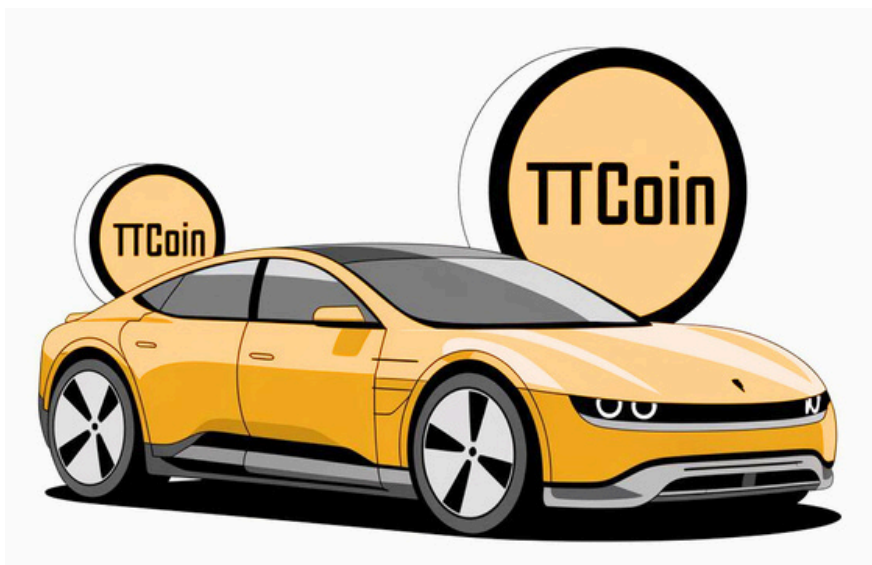

**TTcoin** is more than just a cryptocurrency. It has a patent in **Turkiye** and is allowed to operate in every sector you can think of without producing a car.

Our aim is to work with the same logic as the vision of "xiaomi" company in many brands, clothing and similar sectors by using the name **TTcoin**.

Established companies will merge under the name of **TTcoin** and because they use this name, they will regularly invest a certain amount of their income every month.

As a team, we will publicly offer all existing amounts except branding the **TTcoin** name and 8% **TTcoin** we have. In this way, TTcoin will become a brand in the future and be supported by the communities.

*"The innovation of the future, take your place on the ship of **TTcoin**."*

**TTcoin** has signed agreements with many advertising agencies and generating revenue from mobile applications and games. This income is transferred to exchanges as a fund to serve **TTcoin** investors better while developing **TTcoin** projects. Apart from this, **TTcoin** mining is also ongoing and being done.

In this direction, we are working to develop the project no matter what happens without deviating from the path we are following. Improvements are being made slowly and surely to add value to our investors' rights, assets, and the time they have gave.

**TTCOIN ENERGY AND INFORMATION TECHNOLOGIES**

**[WWW.TTcoin.COM.TR](http://WWW.TTcoin.COM.TR)**

## PLANNED TARGETS

---

**Blockchain networks** and the crypto market are developing day by day and can appear in different areas. Our goal is to provide an infrastructure built with faith. Our goals are to carry out activities that will attract users and strengthen our audience with certain airdrop draws every month.

**TTcoin** has plans to become more than just a cryptocurrency, sometimes the brand of water you drink, sometimes the brand of car you drive, the brand of clothing you wear, and more. The aim is to create an independent infrastructure other than **TTcoin**. The main currency of these companies to be established will be **TTcoin**

To protect **TC Coin** from manipulative movements in the stock markets, the tokens in the market are burned at the end of the month. Our goal is to maintain the **TTcoin** price range, which is free of sudden drops and constantly moving upwards.

We actively use our social media accounts in every field in order to help our users.

## PROJECTS

**Ttcoin** works to protect investors' assets and guarantee that the project is potent and own infrastructure. In this way, the project will contribute to the community and develop its ecosystem without being dependent on anyone.

Except for many other virtual projects, the **TTcoin** team works for many tangible projects in real life. **TTcoin** will enable the purpose of using cryptocurrencies in different areas, hence presenting cryptocurrencies to future generations in a better way.

Plans are being made to ease states to accept **TTcoin** projects in their countries. The first cryptocurrency football club (TTcoin FC) was also set up in this direction.

## TTCOIN FOOTBALL CLUB

**It is the sports club created by the first cryptocurrency project community in the world.**

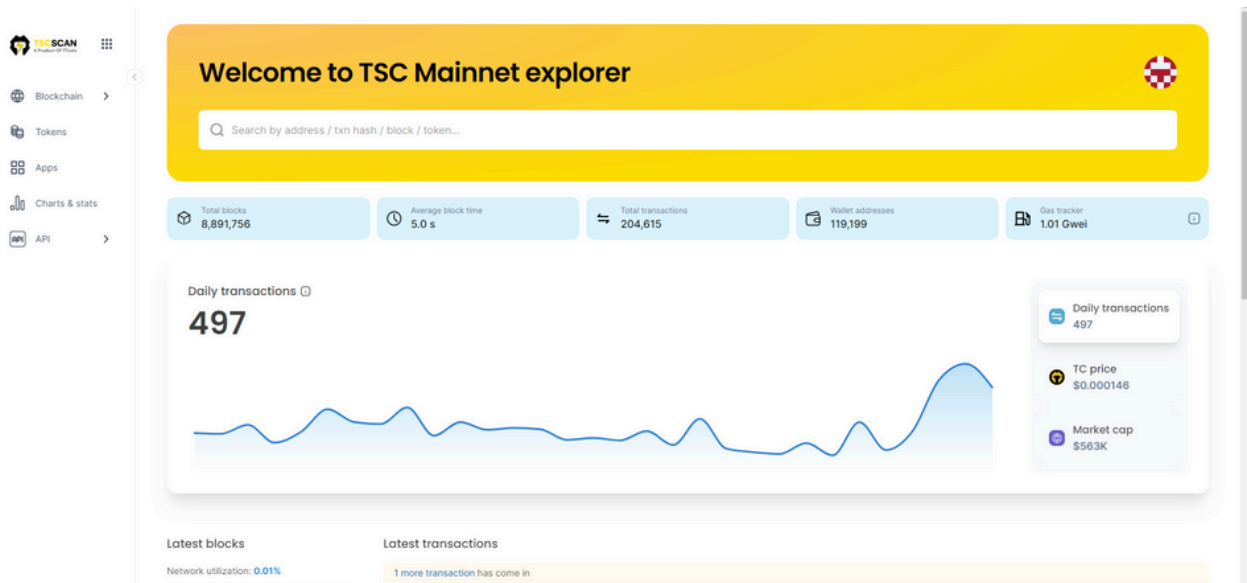

The club will use only **TTcoin** as currency during its activities. In addition, according to some match statistics, **TTcoin** will be burned. For example, we will burn a certain amount of **TTcoin** every time we score a goal or win a match. With the **TTcoin** project, which will bring football and crypto together, investors will see the results of their investments.

Thanks to sports activities, many people will learn about cryptocurrencies and misunderstandings will be avoided. Our goal will be to fight up to the next league. The name of the club is **TTcoin** and it will have the **TTcoin** logo in its logo.

The club now has a facility and a Football field.

# TTCOIN SMARTCHAIN EXPLORER

It is a blockchain system using the **PoA** system designed to make **Ttcoin** independent of the large Gas fees of other networks.

It is designed to be easily integrated with all wallets and is attached as the main network in the **TC-Wallet Pro** wallet, which belongs to the **Ttcoin** ecosystem.

Token projects can be launched. Compatible with all smart contract systems. Token projects can add their information, for example, their logos to the system. It can also be easily added to exchanges. It has now been added to several exchanges.

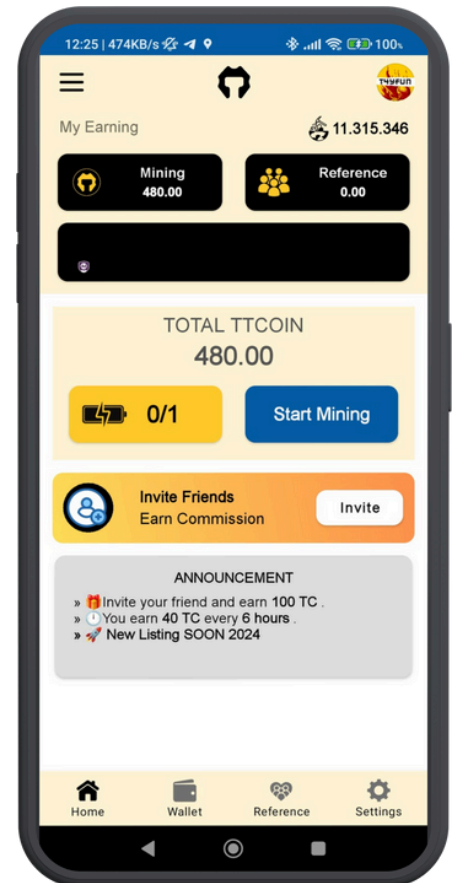

[www.tscscan.com](http://www.tscscan.com)

## TTCOIN NETWORK - MINING

Designed for mobile mining on June 16, reaching more than **2 million users** in a short time (**12,500+ million as of August 2024**) It is an android application that you can take active withdrawal.

Users get rewards by starting mining 4 times a day, and they earn in a short time by taking just 1 minute a day in total.

**Ttcoin Network** application is a system created for community building and advertising purposes.

<https://play.google.com/store/apps/details?id=com.ttcoin.network>

## OTHER PROJECTS

- **TTCOIN WALLET**

It is a decentralized cryptocurrency wallet that includes **TTcoin** and many other cryptocurrencies. Fees are charged as **TTcoin** for the transactions.

<https://play.google.com/store/apps/details?id=com.ttcoin.tcwallet>

- **TCBIT EXCHANGE**

Cryptocurrency exchange where token projects created by the **TSC20** smart contract will be listed for free.

A different project to support **TTcoin** projects and upgrade its ecosystem.

- **TTCOIN SWAP**

It is an ecosystem project in which **TSC20** tokens are also bought and sold within the scope of the shared network of **TTcoin's** networks and the smart contracts it has in its own structure.

[swap.tscscan.com](https://swap.tscscan.com)

- **TTCOIN META**

It is a game where you can explore the diamond realms and convert the diamonds mined in the purchased areas in these realms into **TC**.

The Metaverse realm, which includes market areas and social areas where players can message each other.

## WHICH BLOCKCHAINS ARE TTCOIN AVAILABLE?

---

**TTcoin** is working to be available on many networks. The amount created in these networks is produced by burning in another web, and the supply is kept stable.

You can follow price and supply on cryptocurrency data listing sites. Reliable supply and circulation are available on our website in their most straightforward form.

### CoinMarketCap – CoinGecko

- **TRC20 Smart Contract**

It was the first release network on **March 24**, and there are now more than two billion burned tokens in this network.

Extremely high network fees are charged, which is why most investors use the **BEP20** network.

Token Address:

<https://tronscan.org/#/token20/TCMwzYUUCxLkTNpXjkYSBgXgqXwt7KJ82y>

- **BEP20 Smart Contract**

On **December 23**, the **TTcoin** team switched the **TRC20** network to the **BEP20** network due to the excessive network fees and disruption in the payments to miners. It is currently actively collecting its investors in this network.

# TTCOIN TOKENOMICS

---

**TTcoin** economy; It is planned as in the chart below.

Our aim is to offer all the existing supply (except the Team amount) to the public. Our goal is to build a strong community.

Burning is carried out according to certain criteria and the team will always continue the burnings.

## ADD TTCOIN TO YOUR WALLET

---

**TTcoin** can be easily added to any active cold or currency wallet available in the market. You can easily add our **Blockchain (TSC)** or **TRC20** and **BEP20** smart contracts to the applications with the Contract address or search for the **TTcoin** name.

You can trade in these wallets. You can store your **TTcoin's** in the two most used wallets.

- **ADDING TSCSCAN BLOCKCHAIN TO WALLET**

Many wallets like **Metamask**, **Trust Wallet**, and more have private network attachments. In this section, you will be asked for information about the network you will add. Below is specific information about our own blockchain **TSC network**. With this information, you can add the **TSC network** to the wallet you want.

For more information, visit [\*\*guide.tscscan.com\*\*](https://guide.tscscan.com).

- **TC-WALLET PRO**

<https://guide.tscscan.com/about/>

- **TRUST WALLET**

<https://guide.tscscan.com/trust/>

- **META MASK**

<https://guide.tscscan.com/metamask/>

## MOBILE APPS

---

**TTcoin** develops its own mobile applications. The most popular of these is the **TTcoin Network** mining application.

We are developing applications for our users to use their **TTcoin** money more securely. We also try to develop applications in many of our projects.

**Google Play App Store:** <https://play.google.com/store/apps/dev?id=8807581798284110776>

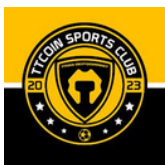

- **TTCOIN NETWORK**

<https://play.google.com/store/apps/details?id=com.ttcoin.network>

- **TC-WALLET PRO**

<https://play.google.com/store/apps/details?id=com.ttcoin.tcwallet>

- **TTCOIN FC**

<https://play.google.com/store/apps/details?id=ttcoin.info>

- **TTCOIN TREES**

<https://play.google.com/store/apps/details?id=com.ttcoin.trees>

## TTCOIN TEAM

---

Unlike other projects, **TTcoin** follows a path and is superior to other projects in this context. The **TTcoin** team funds the project. It makes preliminary agreements with exchanges and obtains many trust certificates. The **TTcoin** team is not responsible for the **TC Coin** other than the amount of **TTcoin** allocated. The **TTcoin** team creates the website and roadmap information. Users and investors control all systems outside of this process.

- **WHAT ARE THE RESPONSIBILITIES OF THE TTCOIN TEAM?**

The **TTcoin** team develops projects and provides investors with an environment of trust. They implement marketing strategies for **TTcoin** and make deals with new exchanges.

The **TTcoin** team manages websites, social media, and many projects. There is no manipulation in the stock markets, and an open market is created. A certain amount of **TTcoin** is burned by the team every month.

**TEAM:** <https://www.ttcoin.info/>

- **HOW MUCH TTcoin IS ALLOCATED TO OUR TEAM?**

The amount allocated to the **TTcoin** team is **500 million coins**. With the BEP20 network and TRC20 network fork, this amount will never change. Projects are carried out with this quantity. With new crypto exchange agreements, some amount is transferred to these exchanges. Exchanges can use it for airdrop rewards. Ensuring the continuity of the projects shows that the team members have a say on **TTcoin**.

- **WHO ARE TTcoin DELEGATES, AND WHAT ARE THEIR DUTIES?**

Delegates represent **TTcoin** in their country of residence. As part of the community, their task is to assist users on social networks in their native language. Their mission is to promote the development of **TTcoin** in their community, listen to other people's ideas, and relay problems to us. They earn a certain amount of **TTcoin** when they do the given tasks.

## MEANING OF THE LOGO

---

The monetary symbol of **TTcoin** is **TC**. Its logo includes the letters **T** and **C**. The letter **T** comes from the founders' name, and the letter **C** comes from the initials of the word coin.

When **TTcoin** first came out, its logo was different, its first logo is **OLD V1**. Later, **OLD V2** was used in applications and exchanges.

With the decision taken at the beginning of **2022**, the logo was transformed into a corporate logo.
